Title II Tips for Reporting
Teachers Prepared by Subject Area and Academic Major

The reporting requirements under Title II of the *Higher Education Act,* as amended in 2008, call for data on teachers prepared by Subject Area and Academic Major. Section I.e of the Institution and Program Report Card (IPRC) collects data to meet this requirement.

In this section, IHEs provide the number of teachers prepared by academic major and subject area. For the purposes of Section 1.e, IHEs should only report individuals who are program completers in the academic year being reported.

Subject area refers to the area in which individuals are prepared to teach. Section I.e of the IPRC provides a list of subject areas to use for reporting (see Table 1). For each subject area listed, IHEs will provide the number of individuals prepared. IHEs should choose the subject area that best fits the area in which the individual is prepared. Individuals may be counted more than once. For example, if an individual is prepared to teach Elementary Education and Mathematics, that individual should be counted in both subject areas. IHEs may leave the cell blank if no individuals were prepared in a particular subject area. IHEs should use the "Other" category sparingly, if there is no similar subject area listed. In these cases, IHEs should use the text box to describe the subject area(s) counted in the "Other" category.

Academic major refers to the undergraduate major granted to an individual. Section I.e of the IPRC provides a list of academic majors to use for reporting (see Table 2). Academic majors vary from one IHE to the next; IHEs should choose the academic majors that most closely match the majors offered by their institution. For example, an individual that majored in Geology should be counted in the "Geological and Earth Sciences/Geosciences" academic major. Please note that the list of majors includes several "Teacher Education" majors, as well as several non-education majors. Please use care in entering your majors to ensure education-specific majors and non-education majors are counted correctly. For example, if an individual majored in Chemistry, that individual should be counted in the "Chemistry" academic major category rather than the "Teacher Education–Chemistry" category. Please also note that individuals may be counted more than once. For example, if an individual majors in Secondary Math Education, that individual should be counted in the "Teacher Education-Secondary Education" academic major category, as well as the "Teacher Education–Mathematics" category. IHEs may leave the cell blank if no individuals were prepared in a particular academic major. IHEs should use the "Other" category sparingly, if there is no similar academic major listed. In these cases, IHEs should use the text box to describe the academic major(s) counted in the "Other" category.
